INTEGRITY | EXCELLENCE | SAFETY | SUSTAINABILITY | PARTNERSHIP | INNOVATION

01 CORPORATE INTRODUCTION

A unified introduction to KETAM Ventures Limited and its multidisciplinary delivery model.

KETAM Ventures Limited is a Kenyan multidisciplinary solutions company established to deliver dependable services across the built environment, institutional supply chains, technology infrastructure, security systems, telemetry, connectivity, and professional workplace solutions.

The company operates through focused divisions that allow clients to engage KETAM either as a specialist service provider or as an integrated project partner. This structure supports disciplined planning, compliant sourcing, technical coordination, practical execution, and reliable post-delivery support.

Corporate position: we help institutions, businesses, developers, NGOs, and public-sector clients plan, source, build, install, secure, connect, furnish, and maintain operational environments that support long-term value.

Master Company Tagline
Building Sustainability. Engineering the Future.

Capability Area	Scope
Infrastructure Delivery	Building works, civil engineering, road works, drainage, water infrastructure, project support, and construction-related coordination.
Institutional Procurement	Reliable sourcing and supply of ICT equipment, office items, furniture, security systems, telecoms equipment, accessories, construction materials, industrial goods, and general institutional supplies.
Technology Systems	ICT hardware, software, licensing, networking, servers, structured cabling, telecoms, internet distribution, wireless systems, cloud collaboration, and support.
Security & Operational Visibility	CCTV, access control, alarms, perimeter security, vehicle and fleet tracking, asset monitoring, dashboards, alerts, and maintenance.
Workplace Solutions	Office furniture, workstations, executive and boardroom furniture, reception furniture, partitions, interior fittings, delivery, installation, and handover.

02 COMPANY SNAPSHOT

Standard corporate information for consistent use in profiles, proposals, registrations, and introductory submissions.

Telephone	+254 722 861 731
Postal Address	P.O. Box 105 - 20108, Rongai, Kenya

Consistency rule: division profiles should use the same company name, website, primary email, phone number, values, and corporate identity. Division taglines may differ, but contact details and brand presentation should remain consistent.

03 STRATEGIC FOUNDATION

Vision, mission, values, and the operating principles that guide delivery.

Vision

To become a respected East African multidisciplinary solutions company recognized for reliable delivery, technical discipline, ethical conduct, safety, sustainability, and long-term client value.

Mission

To deliver dependable construction, procurement, ICT, connectivity, security, telemetry, and workspace solutions through professional coordination, compliant sourcing, disciplined planning, practical execution, and continuous improvement.

Core Value	Meaning
Integrity	Honest, transparent, and accountable business conduct.
Excellence	Strong standards in planning, delivery, supervision, documentation, and client service.
Safety	Protection of workers, clients, facilities, users, and communities during project delivery.
Sustainability	Responsible solutions that support durability, efficiency, environmental care, and long-term value.
Partnership	Clear communication and productive collaboration with clients, consultants, suppliers, regulators, and communities.
Innovation	Practical use of technology, better methods, and modern systems to improve performance and reliability.

04 DIVISION TAGLINE SYSTEM

One master corporate tagline supported by division-specific positioning.

Brand Level / Division	Approved Tagline
Overall Company Profile	Building Sustainability. Engineering the Future.
Construction & Infrastructure	Building Excellence. Delivering Confidence.
Procurement & Supplies	Supplying Excellence. Delivering Confidence.
ICT Engineering, Telecoms & Connectivity	Reliable Technology Infrastructure. Seamless Connectivity. Smarter Operations.
Security & Telemetry	Securing Assets. Connecting Intelligence. Delivering Control.
Office Furniture & Architectural Fittings	Designing Functional Spaces. Furnishing Professional Environments.

Use rule: the master tagline should appear on corporate-level material. Division taglines should appear on division profiles, service sheets, proposals, and website division pages.

05 CORE DIVISIONS AT A GLANCE

Focused service areas operating under one accountable company.

Construction & Infrastructure

Building construction, civil works, road and pavement works support, drainage, water infrastructure, renovations, fit-outs, electrical and mechanical coordination, project supervision, HSEQ, and handover.

Procurement & Supplies

General institutional and office supplies, construction materials, industrial goods, ICT hardware and software, security and telemetry equipment, telecoms, furniture, logistics, and SLA support.

ICT Engineering, Telecoms & Connectivity

Hardware, servers, software licensing, cloud collaboration, networks, structured cabling, fibre and internet distribution, Wi-Fi, business telephony, conferencing, and technical support.

Security & Telemetry

CCTV, remote monitoring, biometric access control, intruder alarms, perimeter security, fleet tracking, asset monitoring, dashboards, alerts, and maintenance.

Office Furniture & Architectural Fittings

Workstations, executive and boardroom furniture, reception solutions, storage, partitions, interior fittings, custom layouts, delivery, installation, and handover.

Integrated project support allows KETAM to coordinate related requirements across divisions while keeping scopes, documentation, and accountability clear.

06 INTEGRATED DELIVERY MODEL

A practical project approach from requirement review to support.

Stage	Phase	Purpose
01	Requirement Review	Clarify scope, priorities, site conditions, budget expectations, timelines, compliance needs, and constraints.
02	Planning & Technical Coordination	Prepare methods, specifications, BOQ inputs, resources, schedules, risk controls, and documentation requirements.
03	Sourcing / Mobilization	Coordinate personnel, materials, equipment, suppliers, logistics, statutory requirements, and site readiness.
04	Execution / Installation	Deliver works, supply items, install systems, manage quality controls, supervise teams, and report progress.
05	Testing, Commissioning & Handover	Inspect completed work, test systems, prepare handover documents, train users where applicable, and close defects.
06	Support & Improvement	Provide maintenance, troubleshooting, warranty coordination, after-sales support, and recommendations for upgrades.

Delivery philosophy: practical planning, clear communication, compliant sourcing, responsible resource control, quality-focused execution, and accountable close-out.

07 MARKET FOCUS

Client categories and operating environments served by KETAM.

Market Segment	Relevant KETAM Support
Public Sector & MDAs	Institutional supply, ICT equipment, office solutions, construction support, security systems, compliance-driven procurement, and maintenance.
County Governments & Utilities	Infrastructure works, water-related support, drainage, road works, ICT, security, telemetry, connectivity, and operational equipment.
Financial Institutions	ICT equipment, networks, access control, surveillance, office furniture, branch setup support, and maintenance.
NGOs & Development Partners	Field-office setup, institutional supplies, technology infrastructure, security systems, mobility support, logistics visibility, and project procurement.
Schools & Institutions	ICT equipment, networking, furniture, security, access control, facility items, and improvement works.
Private Developers & Commercial Clients	Building works, fit-outs, workspaces, networks, security, procurement coordination, and facilities support.

08 QUALITY, SAFETY & COMPLIANCE

Controls that support responsible project and supply delivery.

Quality Management

- Clear scope interpretation before work begins.
- Specification-aligned sourcing and delivery.
- Inspection during delivery, installation, or construction.
- Testing and commissioning for technical systems.
- Client confirmation and handover documentation.

Health, Safety & Environmental Approach

- Safety-conscious work planning and site discipline.
- Appropriate use of PPE, safe work procedures, and supervision.
- Environmental responsibility in site operations, waste control, and resource use.
- Coordination with clients, consultants, and regulatory stakeholders where applicable.

Compliance Orientation

KETAM recognizes statutory, contractual, procurement, tax, safety, environmental, warranty, and documentation requirements as core delivery controls. Tender-specific submissions should be supported with the relevant statutory documents and technical evidence requested by the client.

09 WHY CLIENTS CHOOSE KETAM

Commercial and operational reasons to engage the company.

Strength	Client Benefit
Multidisciplinary capability	One company can coordinate construction, supply, ICT, security, telemetry, connectivity, and workspace requirements.
Focused division structure	Each service area has a defined scope and operational focus while remaining under one corporate identity.
Practical delivery mindset	Workable methods, resource discipline, clear communication, and realistic execution.
Procurement and technical coordination	Support for item supply and the installation or integration required after procurement.
Institutional readiness	Structured for public institutions, MDAs, NGOs, schools, banks, commercial entities, and private clients.
After-sales orientation	Maintenance, troubleshooting, user support, warranty coordination, and close-out form part of professional delivery.

10 DOCUMENTATION & TENDER READINESS

A clean framework for submissions, registrations, and client due diligence.

This corporate profile is a high-level introduction. Formal tenders, supplier registrations, prequalification exercises, and project-specific proposals should be supported with the evidence and statutory attachments requested by the client.

Document Category	Examples / Use
Corporate Documents	Certificate of incorporation, CR12 or ownership records, PIN certificate, tax compliance certificate, postal and contact details, and director information where required.
Procurement Documents	AGPO certificate where relevant, supplier registration data, product schedules, catalogues, quotations, delivery terms, warranties, and after-sales commitments.
Construction Documents	NCA registration where applicable, personnel CVs, equipment schedules, methods, HSEQ records, references, completion certificates, and work programmes.
ICT / Security Documents	Technical datasheets, brand specifications, design notes, installation methods, warranties, maintenance plans, commissioning forms, and training records.
Furniture / Fit-Out Documents	Product specifications, material schedules, layout concepts, installation plans, delivery schedules, warranty terms, and handover checklists.

Important submission rule: the company profile should not stand alone for formal tenders. The applicable statutory, financial, technical, personnel, equipment, and experience evidence must be included.
