

KETAM VENTURES LIMITED

ICT ENGINEERING, TELECOMS & CONNECTIVITY DIVISION PROFILE

Reliable Technology Infrastructure. Seamless Connectivity. Smarter Operations.

Integrity | Excellence | Safety | Sustainability | Partnership | Innovation

The ICT Engineering, Telecoms & Connectivity Division of KETAM Ventures Limited provides reliable technology infrastructure, networking, structured cabling, internet connectivity, wireless systems, telecoms support, hardware, software, licensing, cloud collaboration, and technical support solutions.

We help clients build dependable digital environments that improve communication, connectivity, productivity, security, collaboration, and operational efficiency.

Technology Infrastructure

Practical ICT systems designed to support daily operations and future growth.

Professional Implementation

Supply, installation, configuration, testing, commissioning, and handover.

Seamless Connectivity

Internet distribution, Wi-Fi coverage, network extension, and connectivity support.

Ongoing Support

Preventive maintenance, troubleshooting, user support, and upgrade planning.

Integrated ICT, telecoms, and connectivity solutions.

ICT Hardware Supply

Desktops, laptops, servers, printers, scanners, UPS units, network equipment, accessories, and consumables.

Network Infrastructure

LAN setup, router and switch configuration, firewall setup, segmentation, wireless deployment, testing, and support.

Internet & Wireless Connectivity

Internet distribution, Wi-Fi deployment, coverage optimization, router configuration, network extension, and performance checks.

Software & Licensing

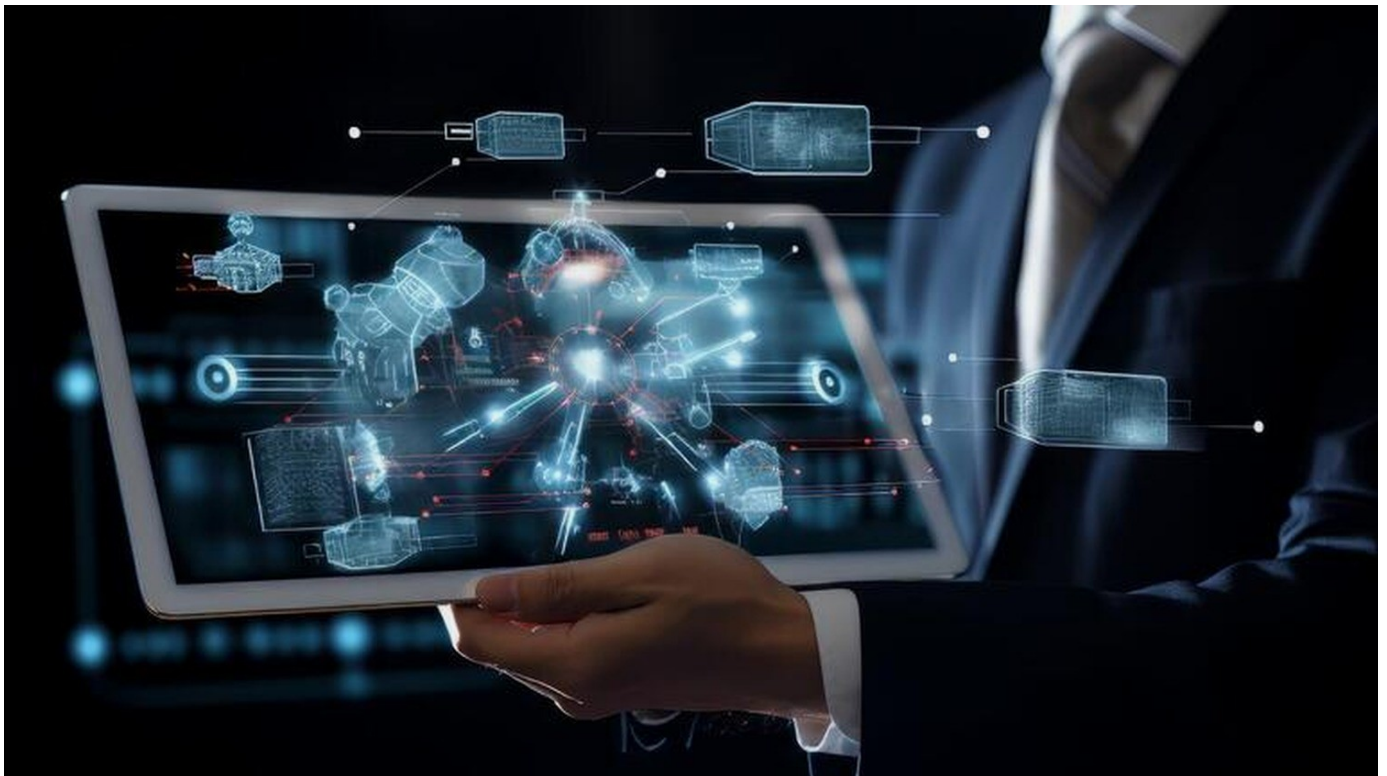

Operating systems, productivity tools, antivirus, endpoint protection, cloud suites, collaboration tools, and license renewals.

Structured Cabling

Data cabling, voice cabling, patch panels, network cabinets, trunking, labeling, testing, and workstation points.

ICT Support & Maintenance

Hardware diagnostics, software troubleshooting, printer support, connectivity troubleshooting, user support, updates, and advisory.

Reliable communication, connectivity, and data-sharing environments.

KETAM Ventures designs, installs, configures, and supports network infrastructure that enables reliable communication, secure connectivity, internet access, and efficient data sharing across organizations.

- Local Area Network setup
- Router configuration
- Firewall setup
- Internet sharing setup
- Network troubleshooting
- Wireless network deployment
- Switch configuration
- Network segmentation
- Network performance testing
- LAN and WAN support

The technical backbone for modern organizations.

Structured cabling and properly organized server/network rooms are essential for reliable ICT, telecoms, connectivity, CCTV, and integrated technology operations.

Structured Cabling

Data cabling, voice cabling, trunking, rack organization, patch panels, labels, testing, and workstation points.

Network Cabinets & Racks

Rack installation, switch mounting, patch panel organization, cabling discipline, and documentation.

Server & Storage Setup

Server installation, shared storage, user access, backups, folders, access control, and maintenance support.

Testing & Commissioning

Connectivity testing, performance checks, endpoint verification, and user-readiness confirmation.

Fibre & Internet Connectivity

Wireless Network Deployment

Seamless connectivity for offices, institutions, facilities, and project sites.

We support clients with practical connectivity solutions for offices, institutions, commercial facilities, compounds, project sites, and remote operations. Our work covers internet setup, wireless deployment, access point installation, network extension, and connectivity troubleshooting.

- Internet connectivity planning
- Branch connectivity support
- Wireless access deployment
- Internet distribution across facilities
- Connectivity troubleshooting
- Signal testing
- Office internet setup
- Router and modem configuration
- Indoor and outdoor Wi-Fi coverage
- Network extension support
- Bandwidth planning support
- Coverage optimization

Communication infrastructure for connected operations.

KETAM Ventures supports clients with telecoms-related infrastructure that enables communication, voice services, internet distribution, and connected operations without shifting into tower or mast construction scope.

Voice & Data Cabling

Voice cabling, data points, telecoms points, patching, and structured cabling for communication systems.

Telecoms Room Setup

Cabinet organization, connectivity equipment installation, labeling, cabling discipline, and handover support.

IP Phone Network Support

IP phone network support, device connectivity, network readiness, and telecoms room coordination.

Expansion Planning

Connectivity equipment installation, troubleshooting, communication infrastructure support, and network expansion planning.

Improving communication, collaboration, and digital productivity.

We help organizations improve communication, collaboration, and document management through business email, cloud storage, productivity suites, user account setup, migration support, and ongoing account management.

- Business email setup
- Cloud storage setup
- Team collaboration tools
- Email migration support
- Cloud backup guidance
- User mailbox configuration
- Productivity suite deployment
- User onboarding
- Account management support

Keeping systems available, organized, and productive.

Our support services help organizations reduce downtime, maintain system performance, and resolve technical issues quickly. We provide practical user-focused support backed by preventive maintenance and technical advisory.

End-User Support

Computer troubleshooting, user assistance, email support, software support, and equipment guidance.

Hardware Diagnostics

Hardware checks, printer support, accessories review, and repair coordination.

Network & Connectivity Support

Connectivity troubleshooting, Wi-Fi support, LAN support, performance checks, and configuration review.

Preventive Maintenance

Regular inspections, updates, cleaning, system checks, and technical reporting.

End-to-end ICT, telecoms, and connectivity support.

- Computers and laptops
- Printers and scanners
- Wireless access points
- Network switches
- Patch panels
- Software licenses
- UPS and power backup systems
- IP phones and communication devices
- Servers and storage devices
- Networking equipment
- Routers and firewalls
- Network cabinets and racks
- Structured cabling materials
- Antivirus solutions
- Collaboration tools
- ICT accessories and peripherals

Key Capabilities

- ICT needs assessment
- Infrastructure planning and design
- Hardware installation
- Network setup and configuration
- Wireless network deployment
- Systems integration
- User training
- Technical support
- Connectivity needs assessment
- Product sourcing and supply
- Software installation
- Structured cabling installation
- Telecoms infrastructure support
- Testing and commissioning
- Preventive maintenance
- Upgrade and expansion planning

Solutions for institutional, commercial, and operational environments.

Industries We Serve

- Government offices
- State corporations
- Hospitals and healthcare facilities
- Financial institutions
- Construction companies
- SMEs and private businesses
- Retail organizations
- Residential and commercial developments
- County government facilities
- Schools and universities
- NGOs and development organizations
- Commercial offices
- Warehouses and logistics firms
- Professional service firms
- Multi-branch organizations
- Project sites and remote operations

Benefits to Clients

- Reliable technology infrastructure
- Better communication
- Reduced system downtime
- Stronger network performance
- Better software compliance
- Faster technical support
- Improved internet connectivity
- Better user productivity
- Improved data sharing
- Better wireless coverage
- Scalable ICT growth
- Improved operational efficiency

Sample Solution Packages

- Office ICT & Connectivity Setup Package
- Network & Connectivity Package
- ICT Support & Maintenance Package
- Institutional ICT Infrastructure Package
- Telecoms & Communication Infrastructure Package

KETAM VENTURES LIMITED

ICT ENGINEERING, TELECOMS & CONNECTIVITY

Power your organization with reliable ICT infrastructure, seamless connectivity, and dependable technical support.

Project Approach

1. Consultation

Understand operational needs, current ICT environment, connectivity requirements, budget, and expected outcomes.

3. Solution Design

Prepare equipment specifications, network layout, cabling plan, wireless design, schedule, and support scope.

2. Needs Assessment

Review hardware, software, network, cabling, internet, wireless coverage, telecoms, users, and support needs.

4. Deployment & Support

Supply, configure, test, train users, commission systems, and provide ongoing maintenance support.

The ICT Engineering, Telecoms & Connectivity Division helps organizations build reliable, secure, connected, and scalable digital environments. Whether the requirement is ICT equipment supply, software licensing, structured cabling, network setup, internet connectivity, wireless deployment, telecoms support, cloud collaboration, or ongoing technical support, KETAM Ventures delivers practical solutions with professionalism, accountability, and confidence.

Building Excellence, Delivering Confidence.
